

§ 354.6

(26) Disaster-initiated reviews and evaluations.

§ 354.6 Billing and payment of fees.

(a) *Electronic billing and payment.* We will deposit all funds collected under this part to the Radiological Emergency Preparedness Fund as offsetting collections, which will be available for our REP Program. The Department of the Treasury revisions to section 8025.30 of publication I-TFM 6-8000 require Federal agencies to collect funds by electronic funds transfer when such collection is cost-effective, practicable, and consistent with current statutory authority. Working with the Department of the Treasury we now provide for payment of bills by electronic transfers through Automated Clearing House (ACH) credit payments.

(b) We will send bills that are based on the assessment methodology set out in § 354.4 to licensees to recover the full amount of the funds that we budget to provide REP Program services. Licensees that have more than one site will receive consolidated bills. We will forward one bill to each licensee during the first quarter of the fiscal year, with payment due within 30 days. If we exceed our original budget for the fiscal year and need to make minor adjustments, the adjustment will appear in the bill for the next fiscal year.

§ 354.7 Failure to pay.

Where a licensee fails to pay a prescribed fee required under this part, we will implement procedures under 44 CFR part 11, subpart C, to collect the fees under the Debt Collection Act of 1982 (31 U.S.C. 3711 *et seq.*).

§ 360.1 Purpose.

The Emergency Management Training Program is designed to enhance the States' emergency management training program to increase State capabilities and those of local governments in this field, as well as to give States the opportunity to develop new capabilities and techniques. The Program is an ongoing intergovernmental endeavor which combines financial and human resources to fill the unique training needs of local government, State emergency staffs and State agencies, as well as the general public. States will have the opportunity to develop, implement and evaluate various approaches to accomplish FEMA emergency objectives as well as goals and objectives of their own. The intended result is an enhanced capability to protect lives and property through planning, mitigation, operational skill, and rapid response in case of disaster or attack on this country.

§ 360.2 Description of program.

(a) The program is designed for all States regardless of their present level of involvement in training or their degree of expertise in originating and presenting training courses in the past. The needs of individual States, difference in numbers to be trained, and levels of sophistication in any previous training program have been recognized. It is thus believed that all States are best able to meet their own unique situations and those of local government by being given this opportunity and flexibility.

(b) Each State is asked to submit an acceptable application, to be accompanied by a Training and Education (T&E) plan for a total of three years, only the first year of which will be required to be detailed. The remaining two year program should be presented in terms of ongoing training objectives and programs. In the first year plan applicants shall delineate their objectives in training and education, including a
